

### POTENTIAL OF ONE ACRE OF SUGAR CANE

☀️ yields 4.5 tons of sugar

🏠 yields 10,000 kw of electricity\*

💧 yields 800 gallons of ethanol

☁️ displaces 4 tons of CO<sub>2</sub>\*\*

\*One acre of sugar cane with leaves and brush can power a Florida home for 10 months out of the year.

\*\*Using fuel produced from one acre of sugar cane displaces 4 tons of CO<sub>2</sub> that would have been emitted by a fossil fuel and contributed to global warming.
